4 Sleeping places
10,30 x 3,50 x 0,90m
Build in 2001, Volvo 6 cilinder 100 HP
400L Diesel, 500L Water

Callisto is a moon located near the planet Jupiter. It is the second largest moon and the moon with the most impact craters in the entire solar system. In Greek Mythology she is the daughter of King Lycaon. Her name is derived from 'Kallisté', which literally translates into the most

The Callisto is a spacious ship that is practical and comfortable. Perfect for enjoying pleasurable trips on the water. The Callisto is practical due to the two cabins that have their own bathroom with shower and toilet. The smart way the layout is divided makes this ship perfect for families with grown up kids or two couples who want to be able to retreat into their own private space. The central heating system and radiators that are located in every cabin make the stay even more comfortable during the entire year.

Please note: by booking this ship without any experience, the Skippertraining is obligatory.

Enjoy the Freedom
