

Azimut S7 MUDITA

EXCLUSIVE CHARTER IN CROATIA

They say technology opens up new horizons and that's certainly the case for the new S7. The use of carbon fiber and a propulsion system featuring three Volvo IPS units mean you can have everything you've always desired from a classy sports motor yacht, without compromising on comfort: a huge living space split between indoor and outdoor areas, four roomy cabins and a garage big enough for both the tender and a jet ski.

Because there are times when you can, in fact, have everything. The S Collection blends a sporty look with elegance thanks to innovative high-tech solutions and high performance materials for desirable, technological yachts.

The stylistic high point of the collection is the dynamic bow cap while aboard, the huge open spaces create a sense of constant dialogue between the interior and exterior for unrivalled comfort and luxury.
